

EFET comments on the revised version of the draft recast Electricity Directive and Regulation issued by the Council of the EU on 13 December 2017.

On 15 December the European Federation of Energy Traders (EFET)¹ published its comments on the draft recast Electricity Directive and Regulation issued by the Council of the EU on 13 December 2017.

While the proposed amendments of the Council generally go in the right direction, we would like to point out a number of inconsistencies and omissions in the text of the two legislative acts on three key topics:

- 1. Transmission capacity calculation and allocation.**
- 2. Re-dispatch rules.**
- 3. Ownership, development and operation of storage facilities by TSOs and DSOs.**

The EFET comments aim at clarifying yet again the role and responsibilities of system operators as neutral market facilitators in relation to the three topics mentioned above. This includes concrete amendment proposals and the corresponding justifications of introducing those.
